

conteX AI

Complete Step-by-Step User Guide & Demonstration Manual

EASY 5-MINUTE GUIDE: HOW TO USE THE WEBSITE FROM START TO FINISH

What is conteX AI? (In Plain Words)

Imagine you have a 30-page PDF report, a research paper, or a company website. Usually, it takes hours to read it and write a PowerPoint presentation, a LinkedIn post, a Twitter thread, and an executive briefing.

conteX AI does all of this in under 30 seconds:

1. You upload your file (or paste a website link).
2. The AI reads and verifies every fact with **zero made-up information (no hallucinations)**.
3. It instantly generates ready-to-download **PowerPoint Slides (.pptx)**, **Word Documents (.docx)**, **LinkedIn Posts**, **Twitter Threads**, and **Infographics**.

Part 1: Quick Start Walkthrough (Step-by-Step)

Follow these simple steps on the website to transform your first document:

STEP 1: Start a New Transformation

📁 Uploading Your Document or Entering a Website Link

On the left sidebar, click on **"New Transformation"** (or click the glowing blue button on your Dashboard).

You have 3 easy ways to provide your content:

- **Option A (File Upload):** Click or drag & drop any **PDF**, **Word (.docx)**, or **Text (.txt)** file from your computer.
- **Option B (Web URL / Website):** Paste any website link (e.g., <https://example.in> or a news article).
Bonus:* You can turn on **"Deep Website Crawl" and it will automatically crawl internal pages like [/about](#), [/services](#), and [/pricing](#)!
- **Option C (Paste Text):** Paste meeting notes, email drafts, or raw text directly into the text box.

What you see on screen: You can enter a **Project Name** (e.g., *"Acme Q3 Review"*) and choose your **Industry Domain** (e.g., *Cybersecurity, Finance, Healthcare, Business*).

🕒 **Pro Tip:** If you don't have a file right now, the website has built-in **Sample Incident Reports** ready so you can test immediately with 1 click!

Once your content is selected, click the blue button: **"Proceed to Step 2: Research & Fact-Checking"**.

STEP 2: Automated Verification

🔍 Live Research & Fact-Checking Radar

The system automatically scans your document through 4 verification stages:

1. **Domain & Purpose Extraction:** Understands what your document is about and outlines its core purpose.
2. **Evidence Cross-Checking:** Matches extracted claims against high-authority sources (Government portals,

academic papers, official industry standards).

3. **Conflict & Discrepancy Check:** Verifies that there are no contradictions in numbers or dates.
4. **Freshness & PII Safety Scan:** Checks document dates and automatically hides private IP addresses or personal phone numbers/emails.

What you see on screen: A live 4-step progress animation with green checkmarks, followed by a neat summary showing total verified facts and key numbers.

Click the green button: **"Proceed to Step 3: Single-Truth Knowledge Base"**.

STEP 3: Review Ground Truth

The Single Source of Truth (Canonical Knowledge)

Before generating posts or slides, the system shows you exactly what facts it extracted from your document so you are 100% in control.

Click across the tabs to explore:

- **Key Facts Tab:** Every single verified fact with its exact page number from your document.
- **Sensitive Data Radar:** Shows any internal IP numbers or private emails that were automatically masked.
- **Risks & Recommendations:** High-priority action items and operational risks found in the document.
- **Summary Tab:** A clean, executive summary narrative in bold typography.

Next Action: When you are satisfied with the verified facts, click **"Proceed to Step 4: Configure Deliverables"**.

Part 2: Generating Your Deliverables & Exports

STEP 4: Select Formats

Choose Which Deliverables You Want to Create

Select the checkboxes for what you want the AI to create for you. You can select all of them at once!

Deliverable	What It Produces	Best For
1. Executive Dossier	A 3-page high-level summary with key metrics and action plans.	C-Suite, Executives & Board Members
2. LinkedIn Thought Post	Engaging post with emojis, key takeaways, hashtags, and visual banner.	LinkedIn Profile / Company Page
3. Slide Presentation Deck	Ready-to-present 16:9 slides with titles, bullet points, and speaker notes.	Client Meetings & Briefings (Downloadable as .PPTX)
4. Visual Infographic	High-resolution structured card with metrics and key pillars.	Reports, Newsletters & Visual Sharing
5. X / Twitter Thread	5 to 8 sequential tweets strictly under 280 characters each.	Social Media Outreach & Announcements
6. Security / Advisory Brief	Technical breakdown with CVSS scores, timeline, and mitigation steps.	Technical Teams & IT Engineers
7. Video Script Package	5-scene video storyboard with narration script and visual prompts.	YouTube Shorts, Reels, or Video Production

Customize Your Settings:

- **Target Audience:** Choose who will read it (e.g. *Executive Board, Regulators, Public, Engineers*).
- **Tone:** Choose your tone (e.g. *Authoritative & Strategic, Urgent, Inspiring, Technical*).
- **Language:** English, Spanish, French, German, Japanese, etc.

Click the big blue button: **"Generate All Deliverables with AI"**.

STEP 5 & 6: Review & Export

Viewing, Editing, Downloading & Publishing

In seconds, your outputs are generated! You will see tabs for each deliverable:

- **Interactive Slide Deck Viewer:** Click "Next Slide" to preview your presentation slides on screen. Click **"Download .PPTX"** to open it directly in Microsoft PowerPoint!
- **LinkedIn Post Card:** Preview your LinkedIn post with emojis and hero image. Click **"Post to LinkedIn"** to automatically copy the text and open LinkedIn!
- **Executive Summary & Advisory:** Read the formatted report. Click **"Export Document"** to download a formatted Word document (.docx).
- **100% Fact-Check Score:** Scroll down to see the Fact-Checking Radar proving that 100% of claims are grounded in your original document.

 **How to Edit with AI:** Want to change something? Click the **"Refine with AI"** button on any deliverable, type what you want (e.g. *"Make this sound more urgent"* or *"Add more emphasis on the cost savings"*), and the AI will rewrite it instantly while keeping all facts 100% accurate!

Part 3: Key Features & Settings Explained Simply

🔒 1. 100% Offline Local AI (Ollama) — Zero Cloud Leakage

If you work with confidential documents, defense reports, or sensitive financial data, you don't have to send any data to cloud services like OpenAI or Google Gemini.

- Go to **Settings** on the left sidebar.
- Select **"Local LLM (Ollama - Llama 3)"**.
- The system will run 100% on your own computer CPU/GPU. No text or data ever leaves your device!

🌐 2. Deep Website Crawling (Root + Subpages)

When you enter a website link like <https://example.in> in the URL tab:

- Toggle ON **"Deep Website Crawl"**.
- Select the number of pages (e.g., 4, 8, 12, 16 pages).
- conteX AI will automatically find and read [/about](#), [/services](#), [/pricing](#), [/team](#), and [/docs](#), combining the whole website into one easy project!

📁 3. Organizational Knowledge Base (RAG)

Want the AI to remember your company's brand voice, safety rules, or corporate tone for every future project?

- Click **"Knowledge Base"** on the left sidebar.
- Click **"Add Document"** and upload your brand guide, compliance rules, or communication policies.
- conteX AI converts them into vector search memories and automatically applies them every time you generate a slide deck or post!

🔗 4. Blockchain Content Integrity & Proof of Authenticity

How do you prove that an executive report was not tampered with or edited maliciously?

- conteX AI creates a unique **SHA-256 digital fingerprint (hash)** for every version of your document.
- Every edit is timestamped and anchored on the blockchain audit ledger, creating tamper-proof proof of authenticity.

📄 5. 1-Click Multi-Format Exports

Every project can be downloaded immediately in your favorite formats:

- 📊 **PowerPoint (.pptx)**: Fully styled 16:9 widescreen slides with bullet points and speaker notes.
- 📄 **Microsoft Word (.docx)**: Professional reports with bold headings, callout boxes, and tables.
- 📄 **Markdown / Text (.txt / .md)**: Raw clean text for blogs or internal wikis.
- 📌 **n8n & Webhooks**: Automatically push generated posts to Slack, Discord, or automated publishing pipelines.

You're Ready to Go!

Open the dashboard, click "New Transformation", and turn your first document into world-class deliverables in

30 seconds.
